WebSite Alarm Using Python.............

In [1]:
```python
import time
```

In [2]:
```python
import webbrowser
```

In [22]:
```python
Set_Alarm = input("Set the website alarm as H:M:S(all in two digits):")
url = input("enter the website you want to open:")
Actual_Time = time.strftime("%I:%H:%S")

while (Actual_Time != Set_Alarm):
    print("The time is " + Actual_Time)
    Actual_Time = time.strftime("%I:%H:%S")
    time.sleep(1)

if (Actual_Time == Set_Alarm):
    print("you should see your webpage now :-)")

    webbrowser.open(url)
```

```
Set the website alarm as H:M:S(all in two digits):08:20:50
enter the website you want to open:Invalid format string
